

A Solenis Company

Our planet's plastic challenge

500%

Plastic waste generation has increased at dramatic rates over the past decades.¹

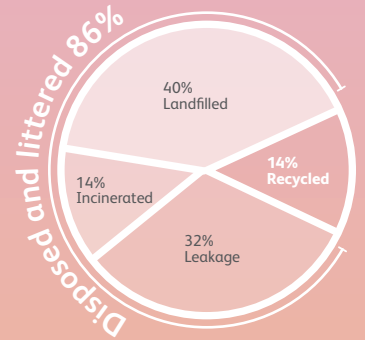

86%

of plastic waste is disposed and littered.

14%

is recycled²

80-85%

of marine litter found on EU beaches is plastic³

50%

consists of single use plastic items³

Make the switch to reusable plastic ware

Prevention is the preferred route in the waste management hierarchy to reduce plastic pollution⁵

The Single-Use Plastic Directive issued by the EU commission requires food service operators to achieve sustained cuts in consumption of single use plastic cups and food containers which they can achieve by switching to reusable plastic ware⁴

If washed more than 10 times, reusable plastic items have a lower environmental impact than single use plastic items⁵

Use Diversey's new combo STACKED with benefits for all your reusable plastic ware

Reusable plastic ware is more difficult to clean and dry, nevertheless must meet the highest standard of hygienically clean ware; otherwise it is not reusable.

Diversey has the perfect solution

**SUMA
PolyWash
+
SUMA
PolyDry**

**Cleans
